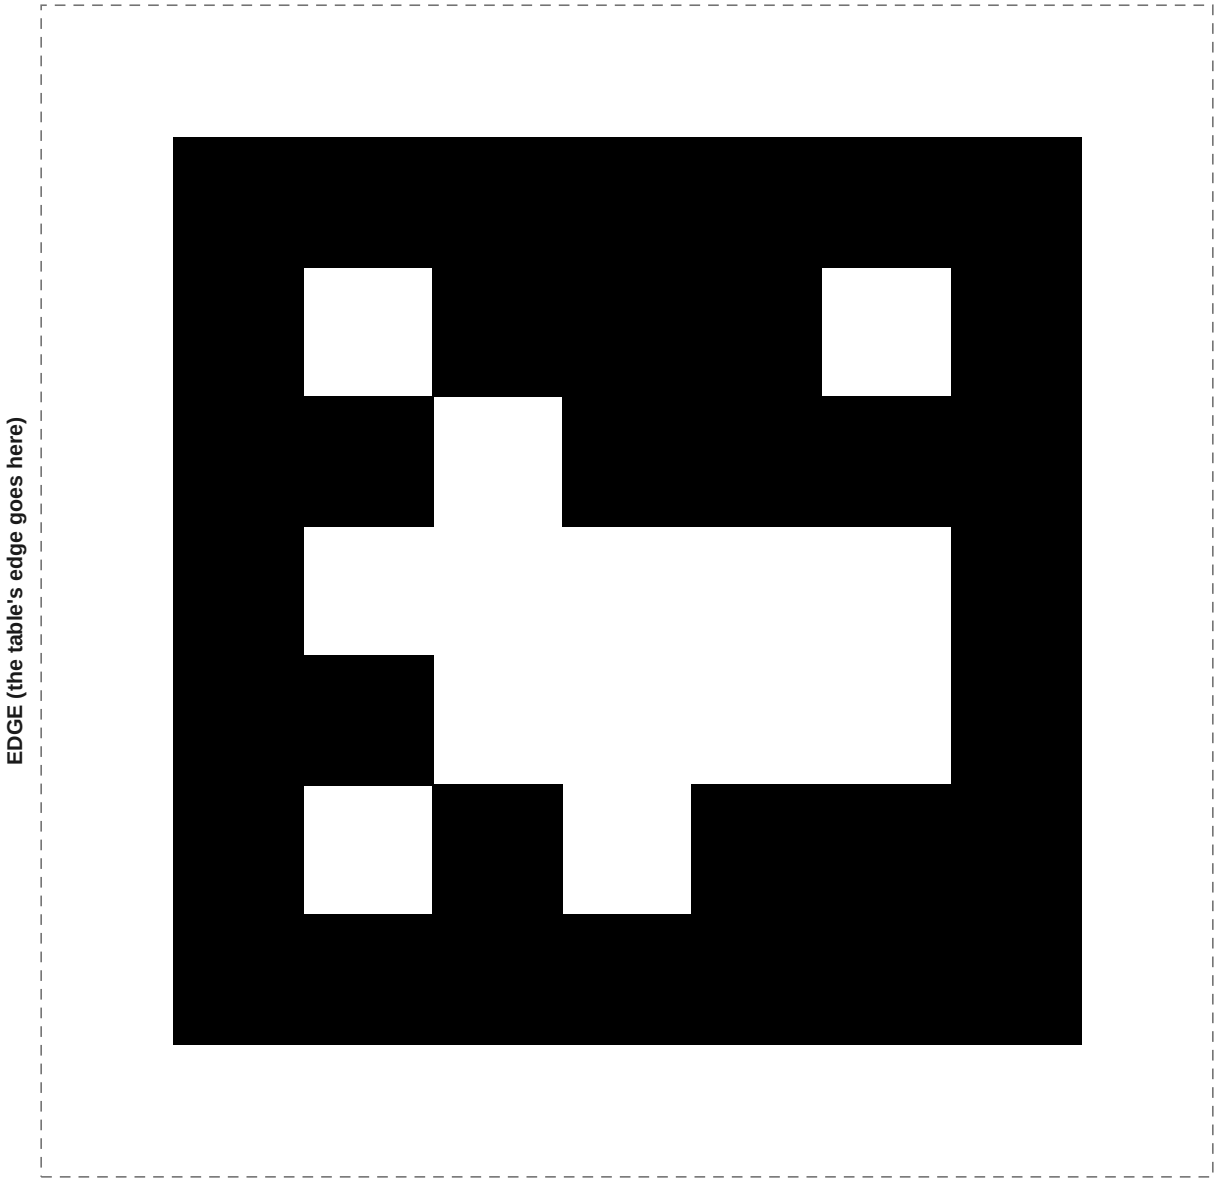
Reference tag 20: CORNER 1 = (0, 0)

Print at 100 % (Actual size, never Fit to page) on MATTE paper. Check: the ruler is 10.0 cm and the black square 12.0 cm.
Cut on the dashed square (15.5 cm). Glue it on thin card so it lies flat.
Put it on the table top with the two sides marked EDGE exactly along the table's two edges at corner 1
(paper edge flush with the table edge, not hanging over). Tape it down flat. The tag's middle is then 7.75 cm in from both edges.
Which way the tag is turned does not matter; which corner or side it is in does (the id above).

id 20 tag25h9 (outside the cut line: nothing printed in the white)

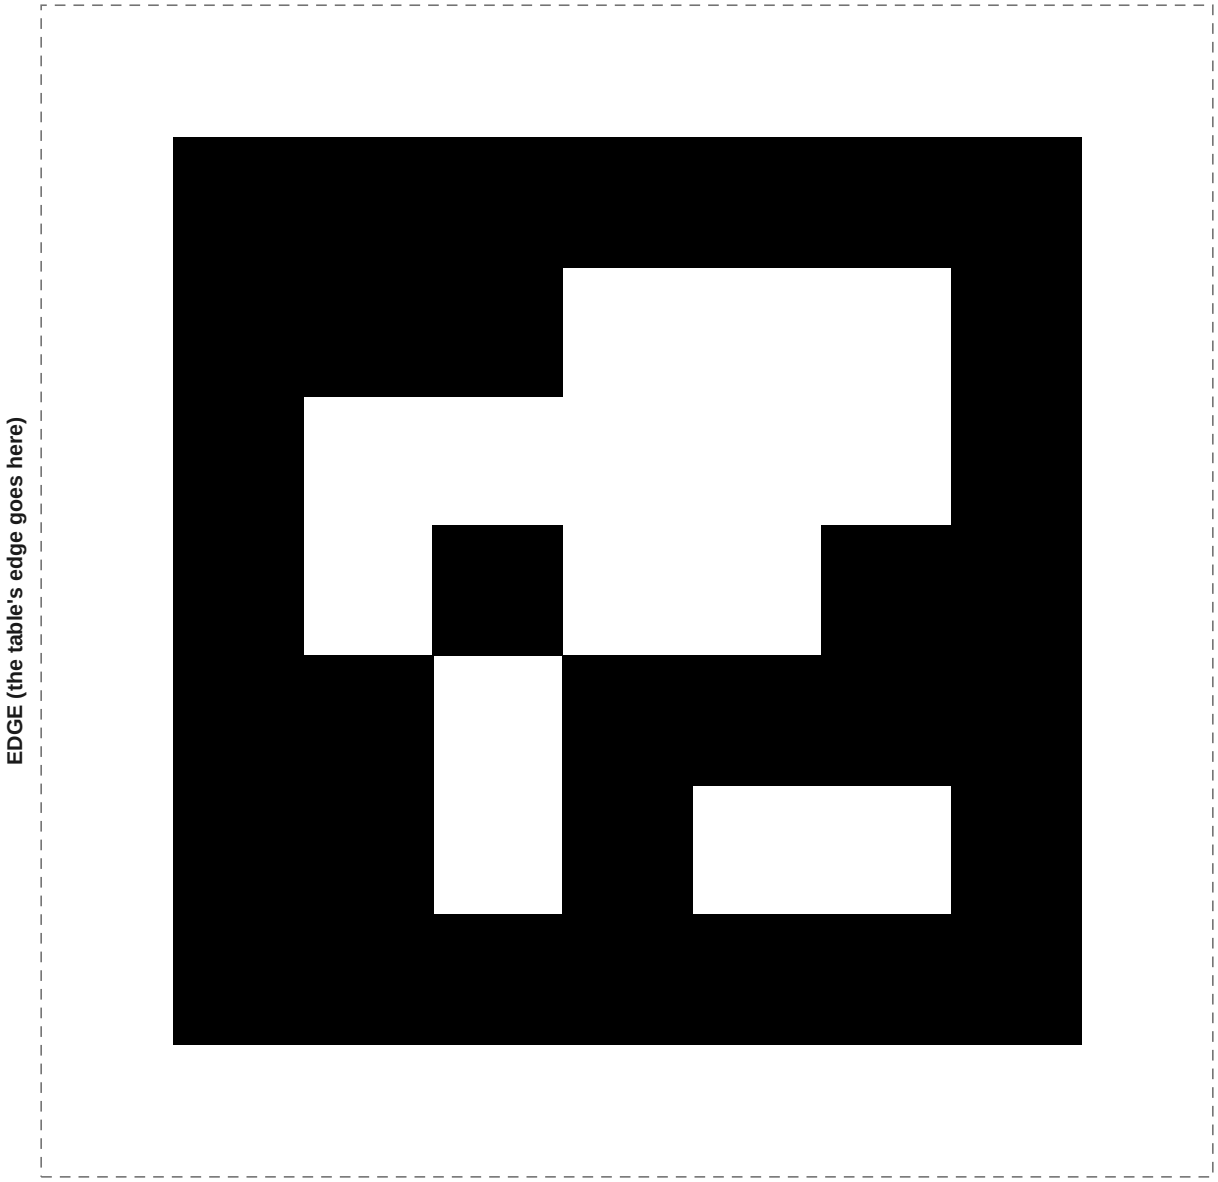


10 cm: measure it before cutting

Reference tag 21: CORNER 2

Print at 100 % (Actual size, never Fit to page) on MATTE paper. Check: the ruler is 10.0 cm and the black square 12.0 cm.
Cut on the dashed square (15.5 cm). Glue it on thin card so it lies flat.
Put it on the table top with the two sides marked EDGE exactly along the table's two edges at corner 2
(paper edge flush with the table edge, not hanging over). Tape it down flat. The tag's middle is then 7.75 cm in from both edges.
Which way the tag is turned does not matter; which corner or side it is in does (the id above).

id 21 tag25h9 (outside the cut line: nothing printed in the white)

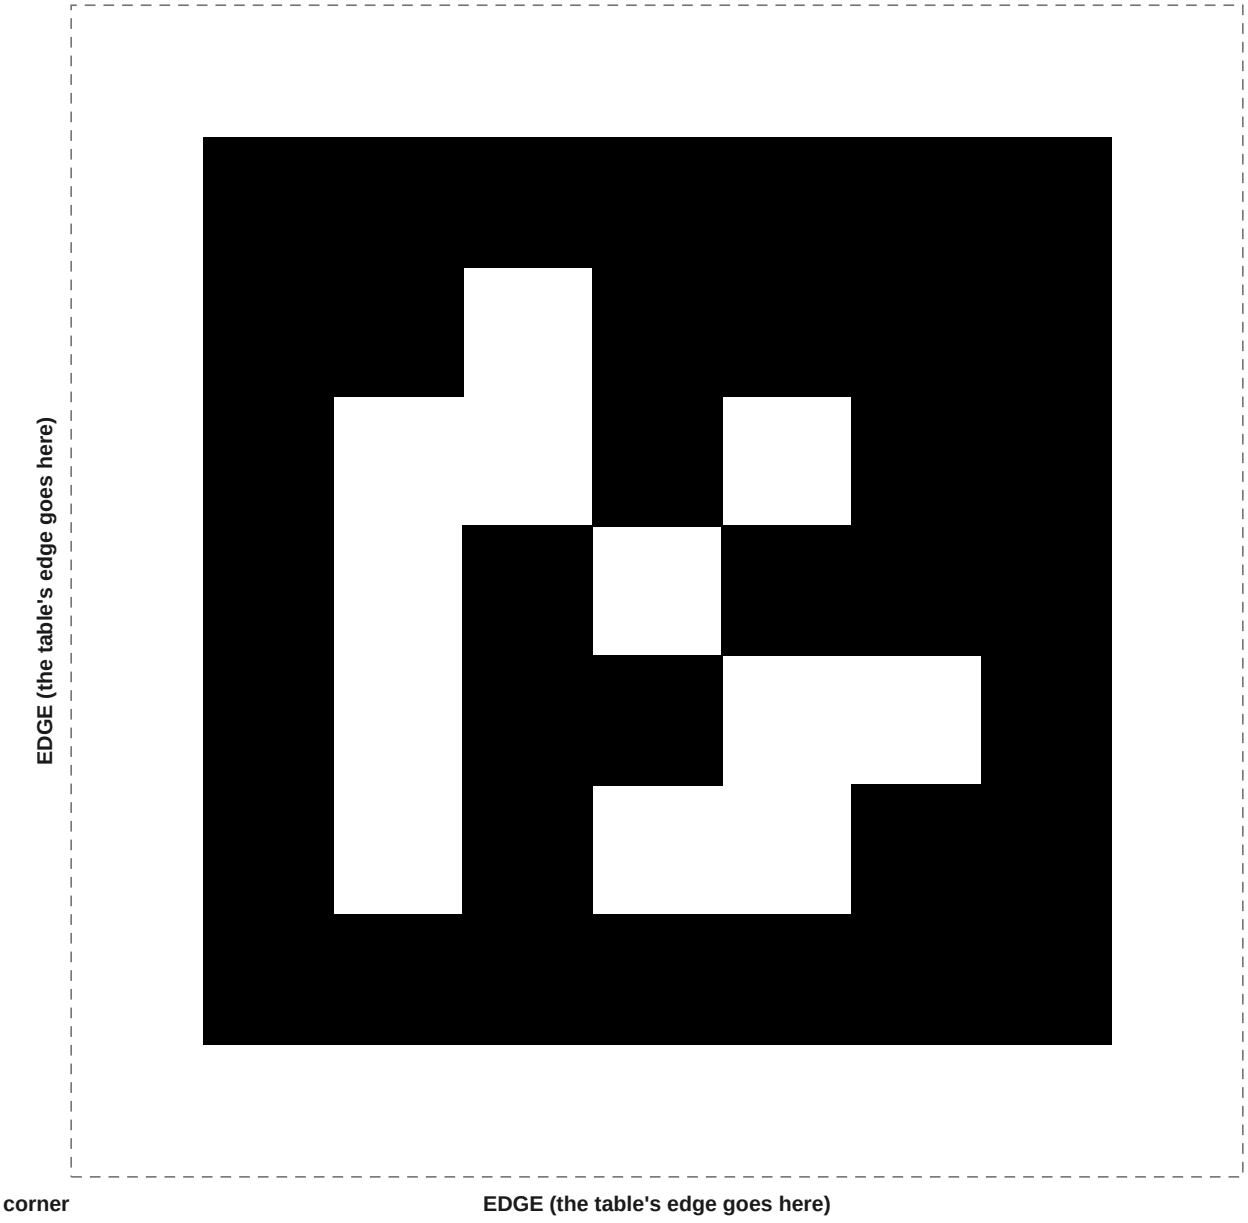


10 cm: measure it before cutting

Reference tag 22: CORNER 3

Print at 100 % (Actual size, never Fit to page) on MATTE paper. Check: the ruler is 10.0 cm and the black square 12.0 cm.
Cut on the dashed square (15.5 cm). Glue it on thin card so it lies flat.
Put it on the table top with the two sides marked EDGE exactly along the table's two edges at corner 3
(paper edge flush with the table edge, not hanging over). Tape it down flat. The tag's middle is then 7.75 cm in from both edges.
Which way the tag is turned does not matter; which corner or side it is in does (the id above).

id 22 tag25h9 (outside the cut line: nothing printed in the white)

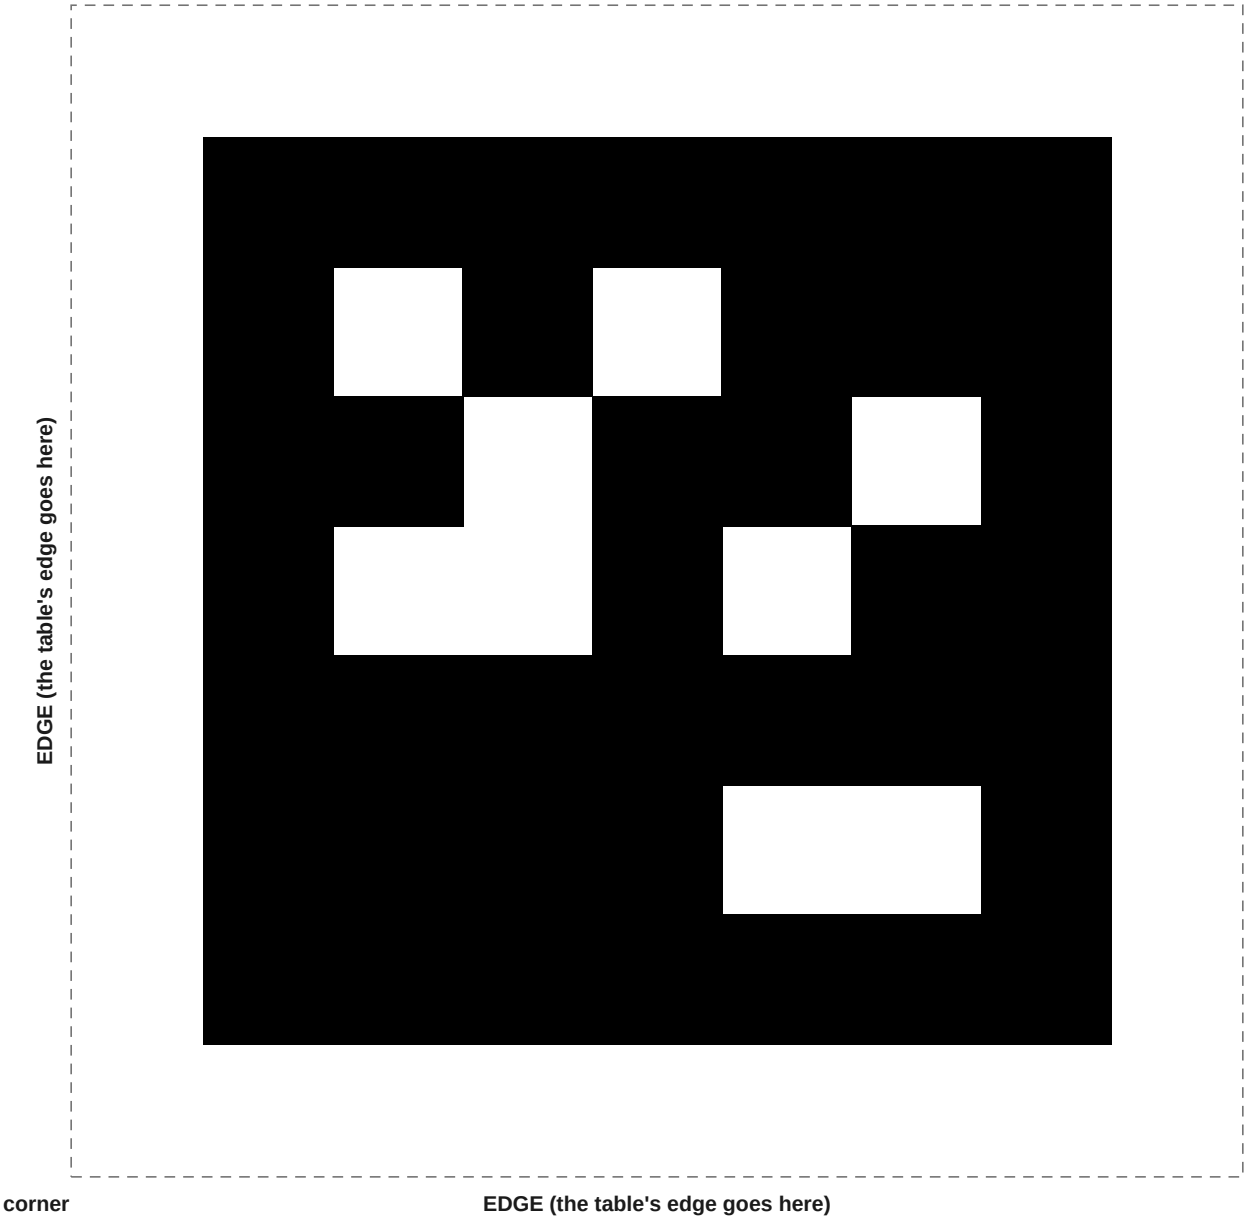


10 cm: measure it before cutting

Reference tag 23: CORNER 4

Print at 100 % (Actual size, never Fit to page) on MATTE paper. Check: the ruler is 10.0 cm and the black square 12.0 cm.
Cut on the dashed square (15.5 cm). Glue it on thin card so it lies flat.
Put it on the table top with the two sides marked EDGE exactly along the table's two edges at corner 4
(paper edge flush with the table edge, not hanging over). Tape it down flat. The tag's middle is then 7.75 cm in from both edges.
Which way the tag is turned does not matter; which corner or side it is in does (the id above).

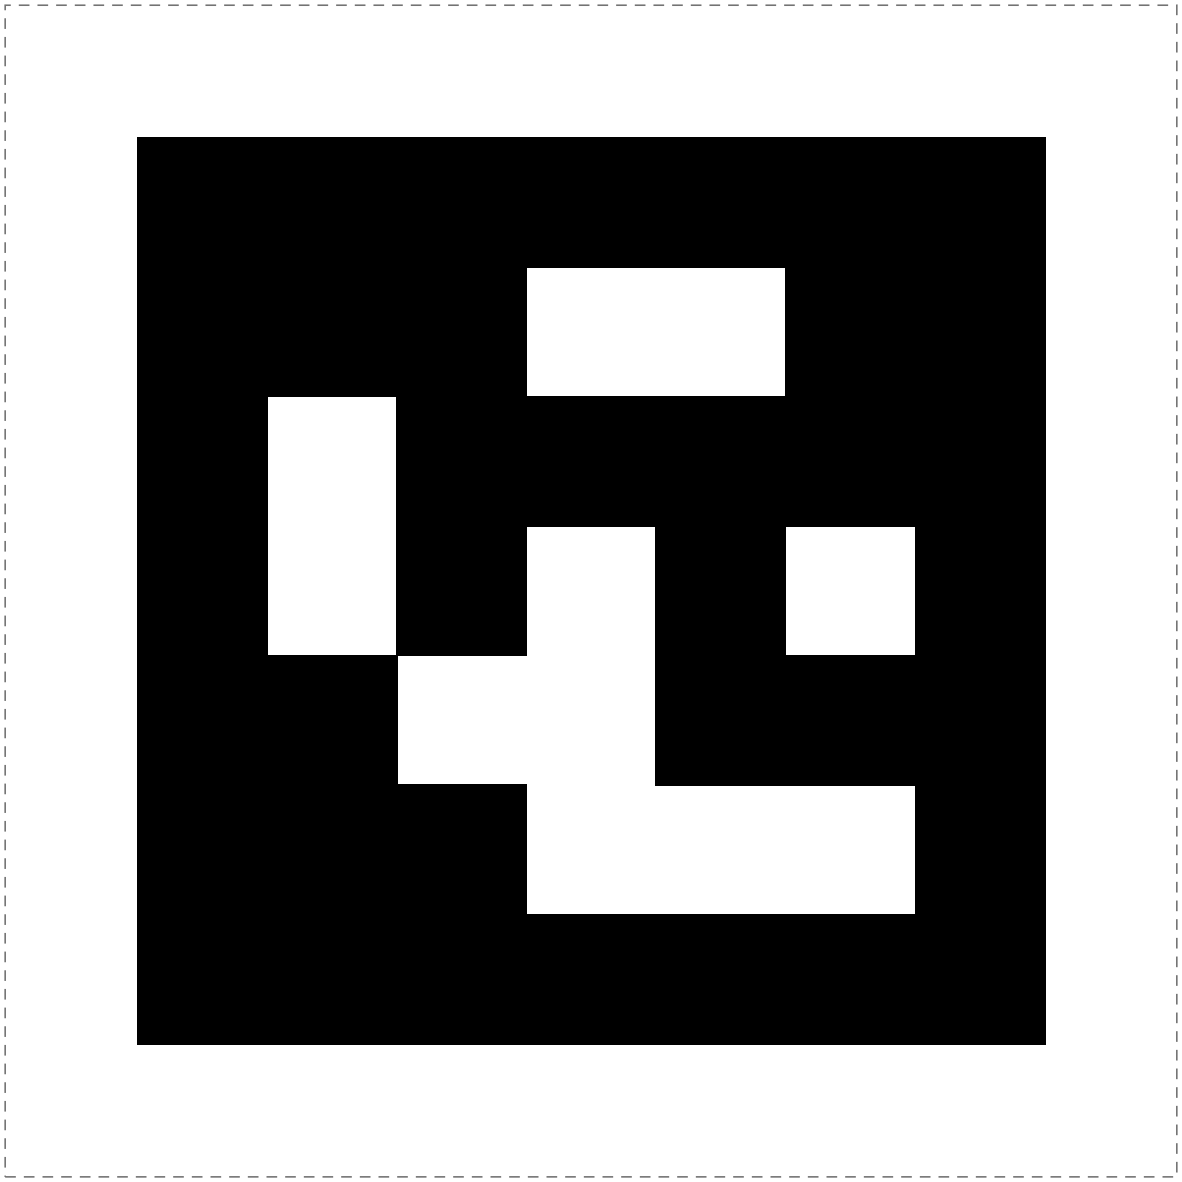
id 23 tag25h9 (outside the cut line: nothing printed in the white)



Reference tag 24: SIDE: the middle of the long side from corner 1 to corner 2

Print at 100 % (Actual size, never Fit to page) on MATTE paper. Check: the ruler is 10.0 cm and the black square 12.0 cm.
Cut on the dashed square (15.5 cm). Glue it on thin card so it lies flat.
Put its side marked EDGE exactly along the long side from corner 1 to corner 2, near the table's middle
(where both cameras see it). Its place along the edge is measured by the cameras; the tag's middle is 7.75 cm in from the edge.
Which way the tag is turned does not matter; which corner or side it is in does (the id above).

id 24 tag25h9 (outside the cut line: nothing printed in the white)



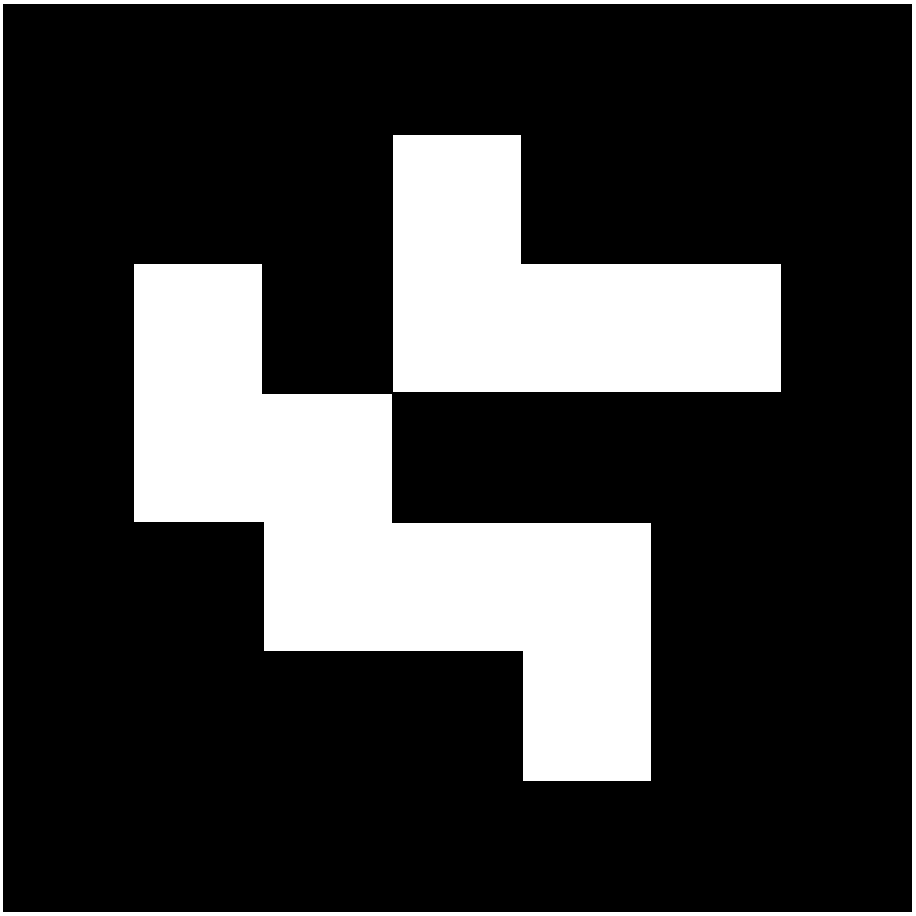
EDGE (the table's edge goes here)

10 cm: measure it before cutting

Reference tag 25: SIDE: the middle of the long side from corner 3 to corner 4

Print at 100 % (Actual size, never Fit to page) on MATTE paper. Check: the ruler is 10.0 cm and the black square 12.0 cm.
Cut on the dashed square (15.5 cm). Glue it on thin card so it lies flat.
Put its side marked EDGE exactly along the long side from corner 3 to corner 4, near the table's middle
(where both cameras see it). Its place along the edge is measured by the cameras; the tag's middle is 7.75 cm in from the edge.
Which way the tag is turned does not matter; which corner or side it is in does (the id above).

id 25 tag25h9 (outside the cut line: nothing printed in the white)



EDGE (the table's edge goes here)

10 cm: measure it before cutting
