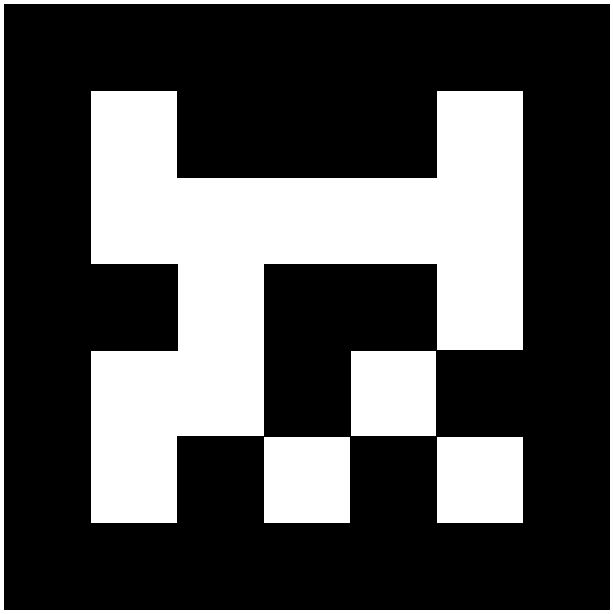
Roof tags: tag25h9, black square 8.0 cm, roof 9.5 cm, site school-conference (page 1 of 2)

Print at 100 % (Actual size, never Fit to page) on MATTE paper: a shiny tag does not read. Before cutting: the ruler must measure 10.0 cm and a tag's black square 8.0 cm. If not, the printer scaled the page: print again. Cut on the grey dashed line (the roof's 9.5 cm square). Glue it flat on the roof with the FRONT arrow towards the robot's nose (its distance sensor), the tag's middle over the middle of the wheel axle. Keep spares off the table.

10 cm: measure this

FRONT (nose)



id 0 = JayA
